Feedback

- What type of industry contribute the most to emissions
 - This allows to see if 2 countries have the same amount of industry but one puts out less emissions
 - When you select something on the map to add data set, show them selected on the heat map
 - Add countries to data set through the tool tip
 - Add a ratio such as how much emissions per person, or per GDP
 - Add emission filter to heat map
-

Reflection of Feedback

The feedback showed us some areas to improve upon, which won't be too hard to implement. We will do our best to include these suggestions

Quality of Feedback

We thought the feedback was both helpful and fair in every regard.
